

(a) round, strongly connected

outer number = d_i ; two blocks shown

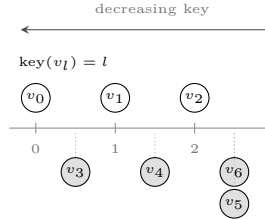

(b) cut at v_0 , then at v_q , $q = 3$

fails its 3 forward arcs $L \rightarrow H$

shaded = H

(c) the keys give C

key(v_h) = $t_h + \frac{1}{2}$; equal t_h stack, larger h first

$C = (v_6, v_5, v_2, v_4, v_1, v_3, v_0)$
